THE INCREDIBLE WORLD OF CHIMA!

# THE BATTLE FOR CHI!

Once, the world of Chima was a place of peace. Intelligent tribes of animals lived and worked together, sharing equally in the mysterious energy source called CHI. But the dark day came when the ferocious crocodiles, led by Cragger, decided that they and they alone should control all the CHI.

Now, a fierce struggle rages across the planet, with the lions, eagles and gorillas fighting the crocodiles, wolves and ravens. At stake: the fate of all the CHI on Chima, and the future of every tribe.

The battle for CHI has begun ...

Chima is a vast, green planet with dense forests and jungles, huge open plains, and dark, murky swamps. Here, the tribes of Chima make their homes. As you travel across the planet, the sounds of nature are mingled with the noise of Speedorz flashing by, the tromp-tromp of Gorilla Strikers, and the roar of Cragger the crocodile's personal command ship cutting through the swamp's muddy waters.

Dominating the landscape is Mount Cavora, a floating peak from which the CHI falls flow into a special pool. There, the CHI energy forms itself into orbs which can be collected and used by the tribes.

## THE TRIBES OF CHIMA

**The Lions** - Brave and tough, the lions believe in following the rules and the power of tradition.

**The Wolves** - Fierce and focused warriors, the wolves have agreed to work for the crocodiles ... for now.

**The Crocodiles** - Ruthless, sneaky and dishonest, the crocodiles will do anything to achieve their goals.

**The Gorillas** - Immensely strong, the gorillas are lovers of nature and can pound a foe while still being careful not to crush a flower.

**The Eagles** - Wise and inventive, the eagles use their wits to defeat their enemies.

**The Ravens** - Thieves and worse, the ravens will buy and sell anything and work for whoever pays them the most CHI.

# CHIMA TECHNOLOGY!

Powered by CHI, built by skilled animal tribes, and faster than anything else in the land, the vehicles and machines used in Chima have some of the most advanced technology ever. They are also often built specific to a tribe's interests and values, and are easily identifiable by their color, design and form.

## SPEEDORZ

Hi-tech transportation used by the majority of tribes in Chima. Long ago, the animals collected rocks that had fallen from Mount Cavora and carved them into wheels of extraordinary strength and power. They fitted these to small chariots that have become the Speedorz you know today.

The wheels of a Speedorz were formed in nature, and draw their energy from nature. A Speedorz will travel fastest and strongest in lush jungles, grassy hills and canyons—wherever there is life, however they will not run in deserts.

Speedorz are used for both sport and battle. Official Speedorz events are held in the Grand Arena of Chima in front of the Lion Temple. Tribes send groups of skilled Speedorz riders to the competitions, and winning the prize: the powerful Golden CHI Orb is a source of pride for many tribes.

Speedorz however, are also used for battle. With their speed and strength, they make for small, yet powerful vehicles to blast right through an enemy's defense.

Each tribe has a different style and method of technique when it comes to Speedorz. The Lions are known for bold design with an emphasis on golden armor. The Ravens often steal pieces and parts from other Speedorz and assemble a mixed-up combination for their Speedorz. Eagles favor light-weight materials that enables them to move more quickly.
